Fix ISRIC soil texture water point index value in LDT

This pull request fixes the water point index values when using the ISRIC soil texture maps in LDT. LDT re-maps the ISRIC soil texture map onto the STATSGO soil classification index. However, the water points were incorrectly assigned a value of 13, when it should be 14 in the STATSGO soil texture classification.

Merge pull request #1366 from cmclaug2/fix/public-testcase-walkthrough-update

Fix/public testcase walkthrough update

- commit 68ce7f583d7fee7311d49635018c4d25955a9281

Adds example job script to the Public Testcases

This describes how to download example batch scripts that I staged at /css/lisdata-pub/Web_Version/.

This is just a note under step one because it could be distracting to fill the public testcase walkthrough with this.

Fix typo in url

- commit a2fe5e94fa104559a1eb91824e5cec8a690a28e4

Update links for landcover files

ral.ucar.edu updated their website. The old links for more information on the USGS_native and MODIS_native landcover data sources have deprecated. This commits adds the new link.

- commit 98eab035e93adfad494c8686f94a216a2b3435c6

Second round of updates to testcase walkthrough

+ New file sizes, ensured wget scripts work, more typos fixes.

- commit 5aae70baeeb0452b38bb780e940cc60bd989e6df

First round of updates to the testcase walkthrough

Includes typo fixes, updates to version and revision dates, adds suggestion to compile with default settings, fixes errors brought up by Hung and other more detailed descriptions when needed. Other commit may be made on top of this to add additional changes after retest
